

PARAMETRES UTILISATEUR

INTRODUCTION

User settings allow you to customize your BlueMind environment.

To access user settings, go to "My account" in the navigation toolbar at the top of all BlueMind pages:

MY ACCOUNT

The General tab in "Account" is used to specify general localization and display settings:

- Display language.
- Time zone. The application's clock is set automatically.
- Date format: day/month/year or month/day/year or year-month-day.
- Time format: 24-hour ("13:00") or AM/PM ("1:00 pm").
- The application that opens by default when you log into BlueMind.
- Change password.

From version 3.5.14, the interface shows you when the password was last changed and whether it was changed by a user or an administrator.

General	Tags	Advanced	External accounts
Language	English ▾		
Time zone	Europe/Paris ▾		
Date format	31/12/2012 ▾		
Time format	13:00 ▾		
Default application	Webmail ▾		
Password	Last password change Monday, April 27, 2020 at 3:43:29 PM UTC+2		
	Current password	<input type="password"/>	
	Password	<input type="password"/>	
	Confirm password	<input type="password"/>	
		<input type="button" value="Update password"/>	
Update my phone status when I am not available	<input checked="" type="radio"/> Do nothing		
	<input type="radio"/> Responder		
	<input type="radio"/> Forward	<input type="text"/>	

About languages

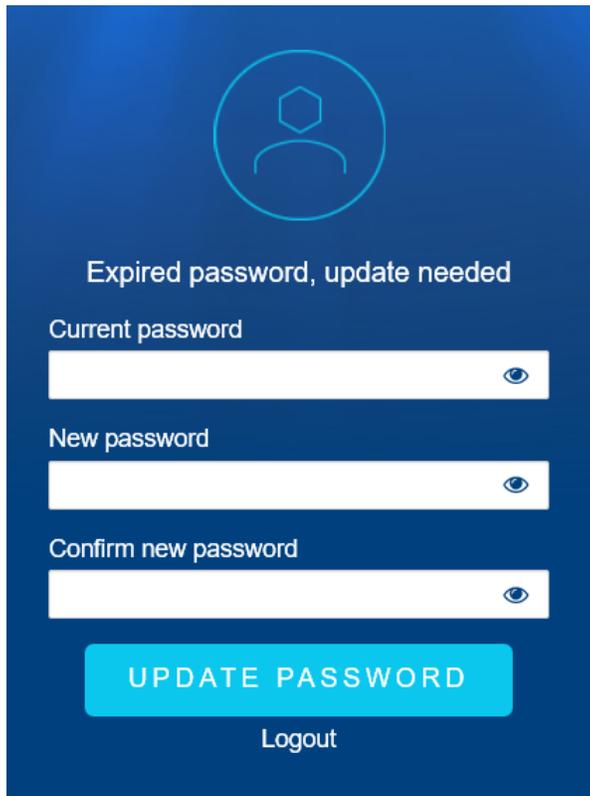

BlueMind is currently available or being translated in several languages. You can see the languages available and their progress on the application's translations page: <https://forge.blue-mind.net/translate/>

PASSWORD EXPIRY

From BlueMind version 3.5.15, administrators can set up a password expiry policy:

- systematically: all user passwords must be changed after a set number of days
- on an ad hoc basis: when an account has been compromised, administrators can force-expire your password and you will have to change it.

In either case, when you attempt to log in with the old password, the window below will open:

The image shows a dark blue dialog box for updating a password. At the top is a white circular icon containing a stylized person. Below the icon, the text "Expired password, update needed" is displayed in white. There are three white input fields stacked vertically, each with a label and a toggle eye icon on the right: "Current password", "New password", and "Confirm new password". At the bottom of the dialog, there is a prominent cyan button labeled "UPDATE PASSWORD" and a smaller white link labeled "Logout".

Once the password has been changed, you will be redirected to the log in window again you will be able to log into BlueMind with your new password.

RESETTING DATA

The "Advanced" tab in "Account" gives you access to advanced settings. Specifically you can reset your application's data and enable notifications (see below).

Account

- To-do list
- Calendar
- Mail
- Contacts
- Downloads
- API Keys

NOTIFICATIONS

Notifications are enabled

[« Back](#) [Save](#)

NOTIFICATIONS

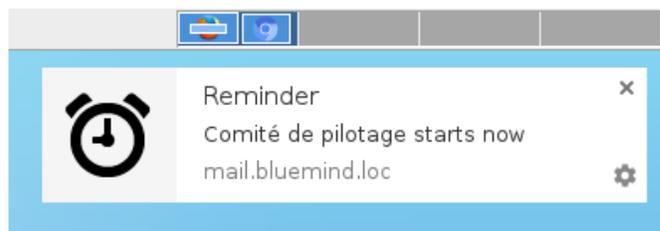

Since the 3.0.8 release, you can get new message notifications and event reminders popups.

The following browsers support this feature:

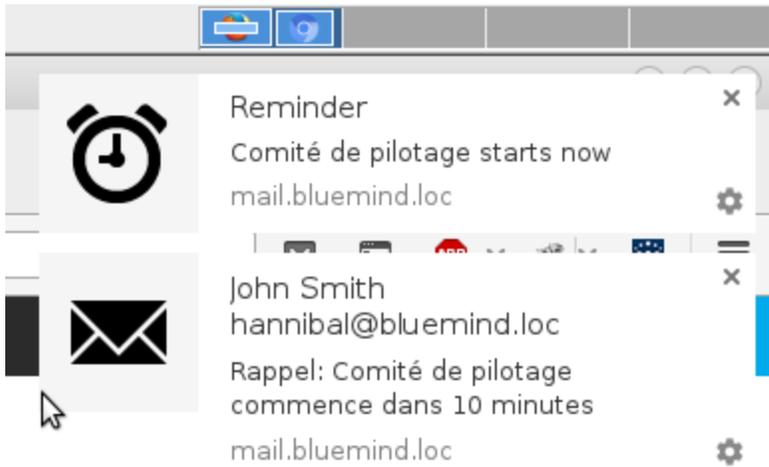

- Chrome 22+
- Firefox 22+
- Safari 6+

The following browsers do not support this feature:

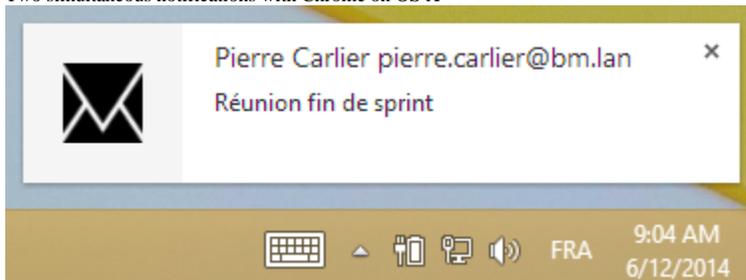

- Internet Explorer
- Opera

Event reminder and new message notification with Chrome on OS X

Two simultaneous notifications with Chrome on OS X

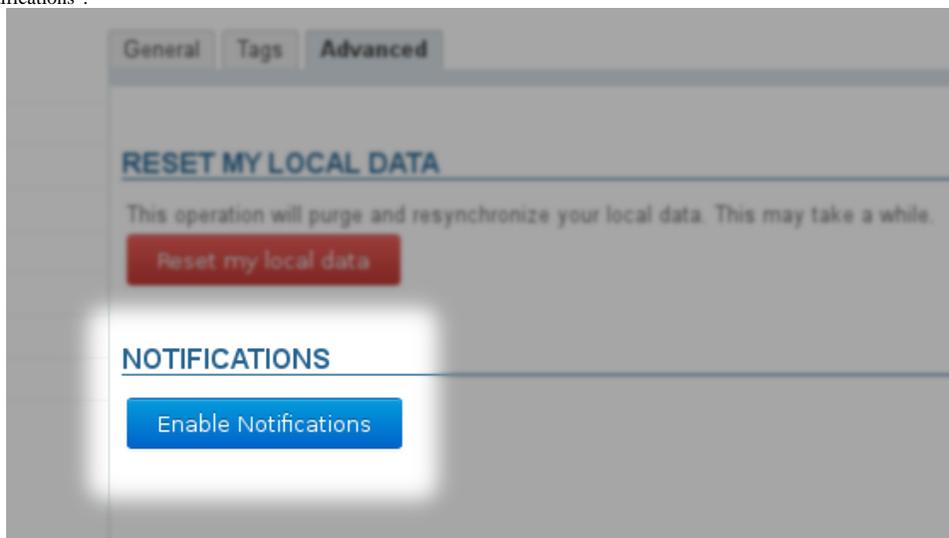

New message notification with Chrome on Windows

Clicking an email notification opens the message in Mail. Clicking an event reminder opens Calendar.

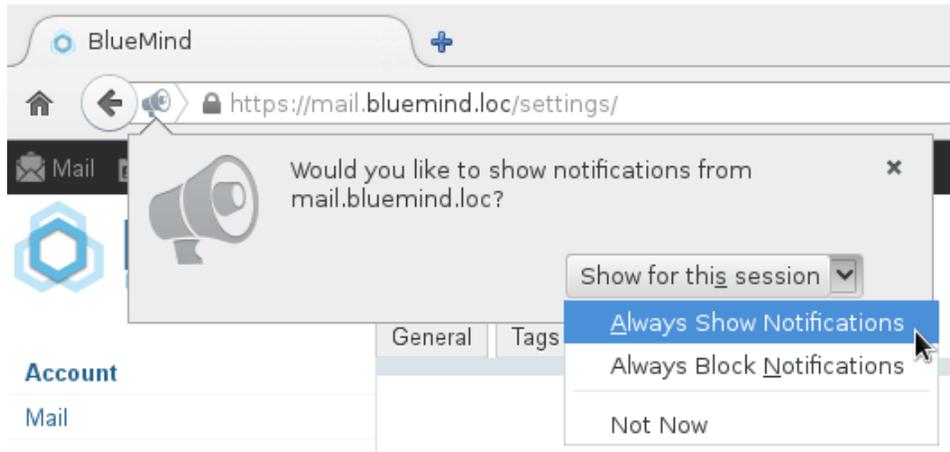

Notifications go away on their own after a few seconds. To force-close them without opening BlueMind, click the "x" in the top right corner of the notification box.

Enabling notifications

- Go to the "Advanced" tab.
- Click "Enable notifications":

- Confirm that you want to enable notifications in your browser. In Firefox, for example, select "Always Show Notifications" in the drop-down menu:

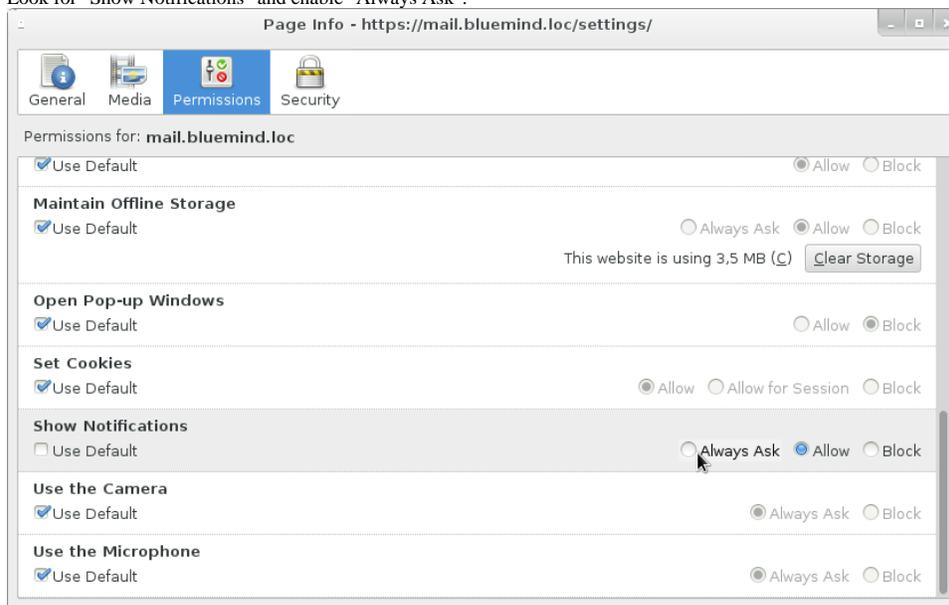

Disabling notifications

If you no longer want to receive BlueMind notifications, the steps to follow depend on your browser.

Firefox

- Go to the Tools menu > Page Info > Permissions tab.
- Look for "Show Notifications" and enable "Always Ask":

Choosing "Block" will stop any future attempt to enable BlueMind notifications. When you go to the page to enable notifications, the button will be visible but disabled.

DOWNLOADS

The Downloads section lets to download connectors your administrator has made available to you to synchronize BlueMind with thick clients (Thunderbird and Outlook, as appropriate).

API KEYS

This section is used to generate access keys to the BlueMind API in order to identify your development "projects".

Generating an API key

To generate an API key for a project:

1. Type the project name in the "Name" text box.
2. Click "Create".

→ the key is generated and created automatically, and immediately added to the list of API keys with the project name you've given it. It can be copied and used right away.

Deleting an API key

To revoke an API key:

1. Click at the end of the key's row.
2. Confirm deletion.

Deletions are effective immediately, without clicking "Save" at the bottom of the page. As soon as you confirm deletion in the warning dialog box, the key is deleted.

ABOUT BLUEMIND

This section shows BlueMind's installed version details and relevant subscription information:

BlueMind
